

54
C1
1. (Amended) A field coil for an electromagnetic rotor comprising multiple windings, said windings substantially entirely coated with a powder resin having a dielectric strength of at least 1000 v/mil, and a thermal stability above 155° C.

92
2. (Amended) The field coil of claim 1 wherein electrical connector portions of the field coil are not coated.

54
C1
3. (Amended) A field coil for an electromagnetic rotor comprising a field coil substantially entirely coated with a powder resin selected from a group consisting essentially of epoxy powder resins and silicone powder resins, wherein said powder resin has a dielectric strength of at least 1000 v/mil and thermal stability above 155° C.
